

**INDIAN POLITY AND EMERGING POLITICAL TRENDS ACROSS THE
WORLD AFFECTING INDIA**

Issue Areas in Indian Administration/Syllabus

- I. Defence
- II. National Security
- III. Security and Defence related issues

**The Post of Tourist Officer included in the Tamil Nadu General Service
(10.06.2023)**

1. ஒரு நாட்டின் பாதுகாப்புக் கொள்கையின் இரு அங்கங்களாக விளங்கும் தடுப்பரண்கள் மற்றும் பாதுகாப்பு அம்சங்களுக்கு இடையிலான வேறுபாடுகளை விளக்கவும்.
Explain the difference between deterrence and defense aspects of a security policy. (6 marks)
2. இந்தியாவில் பாதுகாப்புத் திட்டத்தை உருவாக்குவதற்கான வழிமுறைகளையும், நிறுவனம் சார்ந்த அமைப்பு முறைகளையும் விவரிக்க.
Elaborate on the institutional premises and procedures of Defence Planning in India. (15 marks)

Note: These questions were asked in the recently held Tourism Office Exam, from the above syllabus

TNPSC GROUP I MAIN – PAPER II

INDIAN POLITY AND EMERGING POLITICAL TRENDS ACROSS THE WORLD AFFECTING INDIA

SYLLABUS

Issue Areas in Indian Administration/Syllabus

- I. Defence
- II. National Security
- III. Security and Defence related issues

SHORT NOTES

1. What is the difference between traditional and non-traditional security? Which category would the creation and sustenance of alliances belong to?

Answer:

Traditional	Non-Traditional
Traditional notion is concerned with the use of military, war, balance of power and alliance building.	It goes beyond military by threatening conditions necessary for human survival.
Traditional notion is concerned with the state and its governing institutions.	It covers broad aspect of security i.e. hunger diseases etc.
It is confined to state only by thinking of internal and external threats.	It covers not only the state but also all individuals or human kind.
Its main focus is on force only to achieve the target.	It comprises cooperation, hence it protects human or global security.

2. Is terrorism a traditional or non- traditional threat to security?

Terrorism is a non-traditional threat to wound the peace and order in the country

1. Terrorism refers to political violence to target civilians deliberately and indiscriminately

2. Civilians are usually terrorised to be it as a weapon against national government and other parties in the conflict
3. Terrorism involves hijacking planes or planting bombs in trains, cafes, markets and other crowded places.
4. After a terrorist attack on World Trade Centre on 11 September 2001, the other governments and public also are paying more attention to terrorism.

3. What is Balance of Power? How could a state achieve this?

'Balance of Power' is a balance between bigger and smaller countries by cooperating with each other economically and technologically. A smaller country is always suspicious to break out a war from bigger or powerful country. Hence, they maintain a balance of power to build up one's military power together with economic and technological power-to protect one's own security.

4. What are the objectives of military alliances? Give an example of a functioning military- alliance with its specific objectives.

Objectives:

1. Alliance building is important component of traditional security to threats to deal between states and nations to deter or defend against military attacks.
2. Alliances are formalised in written treaties and identification of who constitutes the threats.
3. Alliances are formed to increase their effective Dower relative to another alliance.
4. Alliances are based on national interests and can cahnge when national interest change. Example - The US backed the Islamic militants in Afghanistan against the Soviet Union in 1980s, but later attacked them when Al-Qaeda, a group of Islamic militants, led by Osama Bin Laden launched terrorist strikes against America on 11th September 2001.

5. Nuclear weapons as Deterrence or Defence have limited usage against contemporary security threats to states. Explain the statement.

Nuclear weapons have limited usage due to arms-control method of cooperation. One of the arms-control treaty was the Nuclear Non-proliferation Treaty (NPT) of 1968 to regulate the acquisition of nuclear weapons. As per this treaty those countries that had fasted and manufactured nuclear weapons before 1967 were allowed to keep their weapons and those that had not done

so were to give up the right to acquire them. The NPT did not abolish nuclear weapons rather it limited the number of countries that could have them.

6. Looking at the Indian scenario, what type of security has been given priority- in India, traditional or non-traditional? What examples could you cite to substantiate the arguments?

India has faced traditional (military) and non-traditional threats to its security that have emerged from within as well as outside its borders. Its security strategy has four broad components is:

1. To strengthen its military capabilities because:

- a. India has been involved in conflict with its neighbours as Pakistan in 1947, 1965, 1971 and 1999 and China in 1962.
- b. In South Asian Region, India is surrounded by nuclear armed countries. Hence India's decision to conduct nuclear test in 1998 was justified to safeguard national security.
- c. India first tested nuclear device in 1974.

2. To strengthen international norms and international institutions:

- a. India's first Prime Minister J.L. Nehru supported Asian solidarity, disarmament, decolonisation and the UN as a forum to settle down international conflict.
- b. India took initiatives to bring about a universal and non-discriminatory nonproliferation regime to enjoy some rights and obligations with respect to weapons of mass destruction.
- c. It used non-alignment to help to carve out an area of peace outside the blocs.
- d. India signed Kyoto Protocol in 1997 to be a part of roadmap for reducing the emissions of greenhouse gases to check global warming.

3. To meet security challenges within the country

- a. Several militant groups from areas such as Nagaland, Mizoram, Punjab, Kashmir have sought to break away from India

b. India makes efforts to preserve national unity by adopting a democratic political system by providing freedom of speech and expression along with the right to vote.

4. To develop its economy

a. India develops the way to lift vast mass of citizens out of poverty, misery and huge economic inequalities.

b. A democratically elected government is supposed to combine economic growth with human development without any demarcation between the rich and the poor.

7. What is meant by disarmament?

Disarmament bounds states to give up certain kinds of weapons to avoid mass destruction through signing various treaties.

8. Why human security is more important in the contemporary world than territorial security? weapon. It is a war against democracy and a crime against humanity:

1. Terrorism refers to political violence to target civilians deliberately and indiscriminately
2. Civilians are targeted to be terrorised to use it as a weapon into this war.
3. Even, the US superpower could not escape itself from terrorism and it became a global phenomenon i.e. terrorist attack on World Trade Tower on 11th September 2001.

Human security is about the protection of people more than protection of states because, during the last 100 years more people have been killed by their own governments than by foreign armies:

1. Protecting citizens from foreign attack
2. Security from violent threats
3. Security from threats to human dignity.

9. What is Global Security?

Global Security implies protection from threats which may have effect on people and states globally. It emerged in 1990 to respond global warming, terrorism, health epidemics etc.

10. What is Global Poverty?

Global Poverty signifies a condition available in the states to be suffered from low incomes and less economic growth i.e. developing or underdeveloped countries.

11. Write a note on Human Security.

Human Security' refers to the protecting people more than protection of states which includes:

1. To protect citizens from foreign attack.
2. To secure people from violence.
3. To protect from individual economic threats.
4. To protect human dignity also.

12. What is military threat?

Military threat refers to military action from another country to endanger the core values of country's sovereignty, independence, and territorial integrity. Military action often targets the men and women i.e. ordinary' citizens.

13. Mention some human rights.

Human rights are the basic conditions which an individual is supposed to be entitled as a human being for all round development. These rights have been categorised as follows:

1. Political rights
2. Freedom of speech and expression
3. Freedom to assemble in a peaceful manner
4. Economic rights
5. Social and civil rights
6. Rights of indigenous minorities

14. Human security stresses on "freedom from want" and "freedom from fear". Justify the statement.

1. 'Freedom from want' refers to economic equality i.e. equal opportunity and economic privileges.
2. 'Freedom from fear' refers to protection from hunger, disease, natural disaster, military threats, genocide and terrorism.

15. Explain Non-traditional concept of security.

Non-traditional concept of security includes human and global security covering a wide range of threats affecting human existence:

1. It does not cover the states only but also the individual and communities.
2. It emphasises on security on nature of threat and right approach to deal with the threat.

16. Explain any four components of India's security strategy.

a. To strengthen its military capabilities:

- i. India has been involved in conflicts with its neighbours as Pakistan in 1947-48, 1965, 1971, 1999 and China in 1962.
- ii. In South Asian region, India is surrounded by nuclear armed countries.

b. To strengthen international nonns and institutions:

- i. India's first Prime Minister J.L. Nehru supported Asian solidarity, disarmament, decolonisation and the UN as a forum to settle down international conflict.
- ii. It used non-alignment to help to cany out an area of peace outside the blocs.

c. To meet security challenges within country;

- i. Several militant groups from areas such as Nagaland, Mizoram, Punjab, Kashmir have sought to break away from India.
- ii. India has made efforts to preserve national unity by adopting a democratic political system by providing freedom of speech and expression along with the right to vote.

d. To develop its economy

- i. India develops the way to lift vast mass of citizens out of poverty, misery and huge economic inequalities.
- ii. A democrati call elected government is supposed to combine economic growth with human development without any demarcation between the rich and the poor.

17. How is global poverty a source of insecurity? Explain.

Global poverty refers to low economic growth, low national income and low standard of living of developing or least developed countries. It is a source of insecurity' because:

1. Half the world's population growth occurs in just six countries- India, China, Pakistan, Nigeria, Bangladesh and Indonesia, considered developing countries and even in poorest countries population is expected to triple in next 50 years.
2. Globally, this disparity' contributes to the gap between the northern and southern countries of the world.
3. Poverty in south has also led a large migration to seek a better economic opportunities in the north.
4. All these created international political friction as international law and norms make a distinction between migrants and refugees as they do not get ready to accept migrants.

18. Which third weapon both the superpowers did not want to give up under the concept of disarmament?

Disarmament requires all states to give up certain kinds of weapons i.e. the 1972 Biological Weapons Convention (BWC) and 1992 Chemical Weapons Convention (CWC) banned the production and possession of these weapons. Despite the US and Soviet Union were not ready to give up the third type of weapons of mass-destruction namely nuclear weapons.

19. Read the following passage carefully and answer the questions:

The US and Soviet Union signed a number of other arms control treaties including the Strategic Arms Limitations Treaty II (SALT II) and the Strategic Arms Reduction Treaty (START). The Nuclear Nonproliferation Treaty (NPT) of 1968 was an arms control treaty in the sense that it regulated the acquisition of nuclear weapons, those countries that had tested and manufactured nuclear weapons before 1967 were allowed to keep their weapons and those that had not done so were to give up the right to acquire them. The NPT did not abolish nuclear weapons; rather, it limited the number of countries that could have them.

Questions

1. What is arms control treaty?
2. Was NPT an arms control treaty? Why?
3. What was the intention behind regulation of NPT?

1. To regulate the acquisition or development of weapons among countries.
2. Yes, because it regulated the acquisition of nuclear weapons to protect world from large scale destruction.
3. It did not abolish nuclear weapons rather it limited the number of countries that could have them.

20. Read the following passage carefully and answer the questions:

Global poverty is another source of insecurity. World population-now' at 650 crore - will reach 700 to 800 crore within 25 years and many eventually level out at 900 to 1000 crore. Currently, half the world's population growth occurs in just six countries - India, China, Pakistan, Nigeria, Bangladesh and Indonesia. Among the world's poorest countries, population is expected to triple in next 50 years whereas many rich countries will see population shrinkage in that period, high per capita income and low population growth make rich states or rich social groups get richer, whereas low incomes and high population growth reinforce each other to make poor states and poor groups get poorer.

Questions

1. Name the countries expected to occur half the world's population growth.
2. Mention two reasons to make rich states more richer
3. What makes poor countries more poorer?

1. India, China, Pakistan, Nigeria, Bangladesh, Indonesia
2. i. High per capita income ii. Low population growth
3. Low income and high population growth

21. What is meant by Security? Mention any four components of Indian security strategy.

At its most basic, security implies freedom from threats. Human existence and the life of a country are full of threats. We generally say that only those things that threaten 'core values' should be regarded as being of interest in discussions of security. Thus, security relates only to extremely dangerous threats - threats that could so endanger core values that those values would be damaged beyond repair if we did not do something to deal with the situation.

India's security strategy has four broad components which have been used in a varying combination from time to time:

1. The first component was strengthening its military capabilities because India has been involved in conflicts with its neighbours - Pakistan in 1947-48, 1965, 1971 and 1999 and China in 1962. Since it is surrounded by nuclear-armed countries in the South Asian region, India's decision to conduct nuclear tests in 1998 was justified by the Indian government in terms of safeguarding national security.
2. The second component of India's security strategy has been to strengthen international norms and international institutions to protect its security interests.
3. The third component of Indian security strategy is geared towards meeting security' challenges within the country. Several militant groups from areas such as Nagaland, Mizoram, the Punjab and Kashmir among others have from time to time sought to break away from India. India has tried to preserve national unity by adopting a democratic political system.
4. There has been an attempt in India to develop its economy in a way that the vast mass of citizens are lifted out of poverty and misery and huge economic inequalities are not allowed to exist.

22. Give a comparative analysis of Indian expenditure on traditional and non-traditional security.

India spends more on traditional security than non-traditional because

1. India has been involved in conflict with its neighbours as Pakistan in 1947-48, 1965, 1971 and 1999 and China in 1962
2. In South Asian Region, India is surrounded by nuclear armed countries. Hence, India's decision to conduct nuclear test in 1990 was justified to safeguard national security.
3. India's first tested nuclear device in 1974
Though India has made efforts to develop its economy and an individual's security from poverty but still it is lagging behind even now and we are supposed to make more efforts.

23. Mention and explain the components and India's security strategy.

India has faced traditional military and 11 non-traditional threats to its security that have emerged from within as well as outside its borders. Its security strategy has four broad components i.e.:

1. To Strengthen its Military Capabilities Because:

- a. India has been involved in conflict with its neighbours, as Pakistan in 1947, 1965, 1971 and 1999 and China in 1962,
- b. In South Asian Region. India is surrounded by nuclear aimed countries. Hence, India's decision to conduct nuclear test in 1990 was justified to safeguard national security.
- c. India first tested nuclear device in 1974.

2. To Strengthen International Norms and International Institutions:

- a. India's first Prime Minister J.L. Nehru supported Asian solidarity, disarmament, decolonisation and the UN as a forum to settle down international conflict.
- b. India took initiatives to bring about a universal and non-discriminatory nonproliferation regime to enjoy same rights and obligations with respect to weapons of mass destruction.
- c. It used non-alignment to help to carve out an area of place outside the blocs.
- d. India signed Kyoto Protocol in 1997 to be a part of roadmap for reducing the emissions of greenhouse gases to check global warming.

3. To Meet Security Challenges within the Country:

- a. Several militant groups from areas such as Nagaland, Mizoram, Punjab, Kashmir have sought to break away from India.
- b. India makes efforts to preserve national unity by adopting a democratic political system by providing freedom of speech and expression along with the right to vote.

4. To Develop its Economy:

- a. India develops the way to lift vast mass of citizens out of poverty, misery and huge economic inequalities.
- b. A democratically elected government is supposed to combine economic growth with human development without any demarcation between the rich and the poor.

24. Explain the areas of operation on non-traditional notion of security.

Non-traditional concept of security includes human and global security covering a wide range of threats affecting human existence:

1. It does not cover only the states but also the individuals and communities also
2. It emphasises on security on nature of threat and right approach to deal with the threat.

Its sources can be identified as follows:

1. Terrorism refers to political violence to target civilians deliberately and discriminately to use it as a weapon against national government.
2. Human Rights refer to basic conditions which an individual is supposed to enjoy as a human being as political rights, freedom of speech and expression, economic rights, social and civil rights to lead an honourable and dignified life.
3. Global poverty refers to low economic growth, low national income and low standard of living of developing or least developed countries.
4. Health epidemics is a very serious threat to country's security because severe Acute Respiratory Syndrome (ARS). HIV-AIDS, bird flue diseases spread across countries through migration, business, tourism and military operations.

25. Write a note on Arms control.

Arms control regulates the acquisition or development of weapons by adopting following measures:

1. The Anti Ballistic Missiles Treaty' in 1992 stopped the US and Soviet Union from using ballistic missiles to limit large scale production.
2. Other arms control treaties were also signed i.e. Strategic Arms Reduction Treaty (START), Strategic Arms Limitation Treaty and Nuclear non-proliferation treaty (NPT) to limit the weapons which many bring large scale destruction.
3. NPT regulated the acquisition of nuclear weapons in 1968.
4. NPT did not abolish nuclear weapons rather it limited number of countries that could have them.
